

DASHBOARD DESIGN PROCESS

STEP 1

ANALYSE REQUIREMENTS

- Collect Requirements
- Choose Right Charts
- Draw Mockups
- Choose Colors

DASHBOARD DESIGN PROCESS

STEP 2

BUILD DATA SOURCE

- Connect Data
- Create Data Model
- Rename Fields & Tables
- Check Data Types
- Understand Data

DASHBOARD DESIGN PROCESS

STEP 3 BUILD CHARTS

- Create Calculated Fields & Test
- Build Chart
- Format
 - Remove Lines & Grids
 - Clean up Axis & Headers
 - Coloring
 - Tooltips

DASHBOARD DESIGN PROCESS

STEP 4

BUILD DASHBOARD

- Draw Mockup for Container
- Create Container Structure
- Put All Charts Together
- Format
 - Distribute Object Evenly
 - Format Colors, size ... etc
 - Fit "Entire View"
 - Add Legends
 - Add Spaces (inner/outer Padding)
- Add Filters & Dynamic
- Add Icons

STEP 1: Analyze the requirements

Tableau User Story | Sales Performance

Intorduction

This user story outlines the specifications for building two dashboards using tableau to help stakeholders, including sales managers and executives to analyze sales performance and customers.

STEP 1: Dashboard 1 – Sales Performance

Sales Dashboard | Requirements

Dashboard Purpose

The purpose of sales dashboard is to present an overview of the sales metrics and trends in order to analyze year-over-year sales performance and understand sales trends.

Key Requirements

KPI Overview

Display a summary of total sales, profits and quantity for the current year and the previous year.

Sales Trends

- Present the data for each KPI on a monthly basis for both the current year and the previous year.
- Identify months with highest and lowest sales and make them easy to recognize.

STEP 1: Dashboard 1 – Sales Performance

Product Subcategory Comparison

- Compare sales performance by different product subcategories for the current year and the previous year.
- Include a comparison of sales with profit.

Weekly Trends for Sales & Profit

- Present weekly sales and profit data for the current year.
- Display the average weekly values.
- Highlight weeks that are above and below the average to draw attention to sales & profit performance.

STEP 1: Analyze requirements

Design & Interactivity Requirements

PARAMETERS

Dashboard Dynamic

- The Dashboard should allow users to check historical data by offering them the flexibility to select any desired year.
- Provide users with the ability to navigate between the dashboards easily.
- Make the charts and graphs interactive, enabling users to filter data using the charts.

Data Filters

Allow users to filter data by product information like category and subcategory and by location information like region, state and city.

Design & Interactivity Requirements

Dashboard Dynamic

- The Dashboard should allow users to check historical data by offering them the flexibility to select any desired year.
- Provide users with the ability to navigate between the dashboards easily.
- Make the charts and graphs interactive, enabling users to filter data using the charts.

BUTTONS

Data Filters

Allow users to filter data by product information like category and subcategory and by location information like region, state and city.

Design & Interactivity Requirements

Dashboard Dynamic

- The Dashboard should allow users to check historical data by offering them the flexibility to select any desired year.
- Provide users with the ability to navigate between the dashboards easily.
- Make the charts and graphs interactive, enabling users to filter data using the charts.

FILTER ACTION

Data Filters

Allow users to filter data by product information like category and subcategory and by location information like region, state and city.

Design & Interactivity Requirements

Dashboard Dynamic

- The Dashboard should allow users to check historical data by offering them the flexibility to select any desired year.
- Provide users with the ability to navigate between the dashboards easily.
- Make the charts and graphs interactive, enabling users to filter data using the charts.

Data Filters

Allow users to filter data by product information like category and subcategory and by location information like region, state and city.

QUICK FILTERS

STEP 1: Analyze requirements

DASHBOARD COLOR SCHEME

Choosing colors at **start** of a project is important.
Early selection of colors helps maintain
consistency through out the project.

DASHBOARD COLOR SCHEME

2x BASIC COLORS

#303030

#b3b3b3

2x CUSTOME COLORS

#ff5500

#303030
